

CASE STUDY

HARTSFIELD-JACKSON ATLANTA INT'L AIRPORT - 5TH RUNWAY, ATLANTA, GA ROADWAY SLOPE STABILIZATION

PROJECT SUMMARY

Heavy rainfall at Hartsfield-Jackson International Airport in Atlanta, Georgia caused slope instability and erosion concerns. C.W. Matthews Contracting Co. Inc. and Athena Construction Group Inc. searched for a more cost-effective solution compared to traditional methods, which called for the ARMORMAX® 75 soft armoring solution. Propex worked with the contractors to ensure an appropriate model and design for slope stabilization using ARMORMAX® 75 and installation support was provided by a Propex Certified Installation Manager. The project was completed in September 2016.

PROBLEM

Heavy erosion and slope failure from heavy rain events

SOLUTION

ARMORMAX® 75 was designed and installed for deep slope stability

INSTALLATION

Significant time and cost savings over hard armor solutions

PERFORMANCE

Vegetated engineered soft armor slope stabilization solution

FEATURES & BENEFITS

- Up to 75 year design life
- Engineered Solution for Slope Stabilization
- Designed for Shallow Plane Slope Failure Mitigation
- Rapid and Easy Installation
- More Cost-Effective than Traditional Solutions
- Proven Technology / Sustainable Results
