

CONCRETE WASHOUT BERMS

ECONOMICAL CONTAINMENT FOR CONCRETE WASHOUT

Concrete Washout Berms are a portable erosion control solution. They offer safe containment of harmful industrial concrete sediment, paint, drywall mud, stucco, and mortar. The berms are UV resistant with poly liner. As a portable containment for concrete and other materials, it is quick to set up and compatible with mixers, pump trucks, and wheelbarrows. Built-in tie-downs secure the Concrete Washout Berms to standard wooden pallets (not included) for easier handling and transport. Be sure to dispose of it after evaporation and job completion. With safety in mind, we also recommend having a Spill Kit on-site and at the ready.

In addition, Ferguson Waterworks carries Outpak Washouts. Convenient and portable, the Outpak Washouts keep your job site clean and compliant with BMP.

ADVANTAGES

- Portable solution for harmful industrial concrete sediment, paint, drywall mud, stucco and mortar.
- UV resistant, poly liner.
- Unfolds for simple and quick set up in seconds.
- Compatible with mixer, pump trucks and wheel barrows. Built-in tie-downs allow Berm to be secured to standard wooden pallets for easier handling and transport.
- Dispose of after evaporation and job completion.

ARE YOU COMPLIANT?

Outpak Concrete Washout® unit is designed to be a portable solution for harmful industrial concrete sediment, paint, dry wall mud, stucco, and mortar. With Outpak Concrete Washouts your job site will be organized, eco-friendly, and BMP compliant to avoid costly fines. They are designed for a simple and quick set-up in minutes and can remain for the duration of the project. Outpak Concrete Washout is compatible for both mixer, pump trucks and wheel arrows. Dispose of after evaporation and job completion.

INSTRUCTIONS

Be sure to check your local and state regulations, which may be more stringent than the federal regulations, on which these instructions are based. **WARNING:** Always use the appropriate Personal Protective Equipment when handling concrete or concrete washout water.

Options for use: The Concrete Washout Berm can be used with or without a pallet (not included). The use of a pallet allows for easier handling when full.

- 1 Unpack the Concrete Washout Berm and unfold it near the area where it will be used.
- 2 Straighten the support legs in each corner until they are vertical. This gives the Concrete Berm its shape as well as some structural reinforcement.
- 3 If using a pallet, tie or attach the Concrete Washout Berm down to the pallet using the grommets in each corner of the berm. Otherwise, if not using a pallet, the Concrete Washout Berm can be staked down to hold it in place.
- 4 Place the Concrete Washout Berm in a position to capture the concrete washout water from the equipment being cleaned (truck chute, pump, mixer, wheel barrow, etc.)
- 5 Allow the washout water to dry and evaporate in the Concrete Washout Berm and dispose of the hardened concrete waste per governing regulations.

Corrugate Washout

Outpak Corrugate Washout is a Universal, "portable" washout. Good for mixer truck, and wheel barrow washout containment. Dispose of after job completion.

Pump Truck Washout

6'x6' Outpak Washout holds up to 1.3 cubic yards of concrete and waste water.

945-123030	30"×30"×14"h Corrugate Washout	0.25 cu yds	6 lbs.
945-123404	4"×4"×14"h Corrugate Washout	0.68 cu yds	10 lbs.
945-123406	6"×6"×12"h Corrugate Pump Washout	1.33 cu yds	16 lbs.

PVC Washout

PVC Washouts are designed for larger volume of containment for pump trucks and mixer trucks. The high UV resistance of the PVC Washout, allows for longer job life and higher tolerance to weather conditions.

965-001430	6'×8' PVC Washout	2 cu yds.	30 Washouts	38lbs.
965-001440	8'×10' PVC Washout	3 cu yds.	45 Washouts	50lbs.
