

DRAIN GUARD INLET FILTER

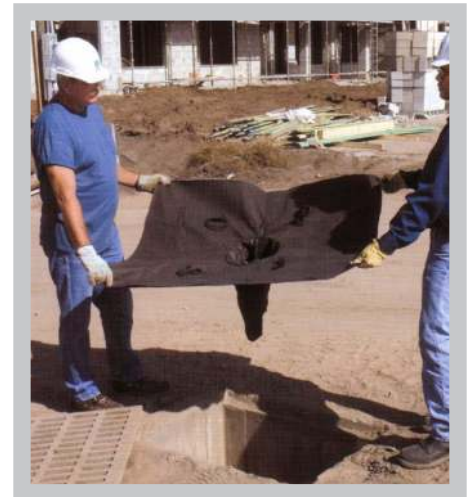

INLET PROTECTION

Ultra-Drain Guard keeps sediment and other pollutants from entering the water system.

Stormwater pollution has become a major concern both locally and on a national level. Ultra DrainGuards remove waste from stormwater before it can become a problem in the water system. It exceeds an 80% sediment removal efficiency and helps comply with NPDES, 40 CFR 122.26 (1999) when used as Best Management Practice in Storm Water Pollution Prevention Plans.

UltraDrain Guard captures oil and sediment on construction sites, parking lots and industrial sites. It is easy to install and reuseable. It is designed with high flow, over flow weir for extreme wet weather events.

ADVANTAGES:

- High flow / high strength outer filter
- Filter media composed of 100% recycled, shredded tires
- US Patented
- Weight of unit holds it securely to curb surface
- DrainGuard Plus also available
