

# “Olde Florida RV Resort”

LaBelle, Florida

### Featured Product(s):

Solmax Mirafi RS580i

### Product Advantages:

- Solution for base course reinforcement and subgrade stabilization of jobsites.
- Panels can be seamed in the factory or field, providing cross-roll direction strength to facilitate efficient installation.

### The Challenge

Unsuitable soils at an RV resort in LaBelle, FL would have needed to be excavated and removed from the site using many dump trucks.

### The Solution

The owner saved over \$4,000,000 by avoiding excavation and haul out charges of the unsuitable soils. The general contractor and subcontractor both saved time and money by having larger factory sewn Mirafi RS580i widths when installing down miles of roadways on the project.
